Your strategic planning expertise will enhance faculty support and professional development, ensuring the highest performance standards. Key responsibilities include leading cross-functional teams, managing instructional design projects, and collaborating with institutional organizations to align with our strategic goals. You will champion best practices in integrating cutting-edge technologies into our curriculum, providing valuable insights that drive engagement and enhance learning experiences.

If you're passionate about harnessing the potential of XR, AI, and other emerging technologies to transform education, we want to hear from you! Join us in shaping the future of instructional solutions.

To support the Executive Director of Instructional Innovation and assist in representing the Instructional Solutions teams and learning technology initiatives with internal and institutional organizations. To manage assigned resources for instructional course design and production projects, technology projects and initiatives. Supervise personnel responsible for managing instructional technology, digital accessibility support to faculty and instructional designers in development and delivery of course materials, learning modules, and instructional technology activities. Provide supervisory and strategic planning support for innovative, learning technology projects.

Position Type Full Time Type of Recruitment General Public Minimum Qualifications

Master's degree in instructional technology, multimedia production, education, communications, engineering, computer sciences, or related field. Or a bachelor's degree in the above-mentioned fields of study with work experience equivalent to a master's degree in those same or related fields of study.

- Considerable knowledge of the industry accepted practices, procedures, and/or processes for developing and facilitating effective and innovative training for faculty.
- Considerable knowledge of accepted practices, procedures, and/or processes for managing a higher education team.
- Considerable knowledge of techniques for fostering and maintaining highly effective working relationships with those responsible for managing instructional technology, digital accessibility support to faculty and instructional designers in development and delivery of course materials, learning modules, and instructional technology activities. Including quality control processes to ensure standards and compliance.
- Considerable knowledge and understanding of learning theory and practice.
- Excellent problem-solving skills to generate and evaluate creative new ideas and explore alternative solutions.
