Job Description

The Manager of Engineering Research Operations assists with research operations, construction, and operation throughout the Samuel Ginn College of Engineering. Working directly with the Director of Engineering Research Operations, this position performs a variety of tasks requiring the application of engineering concepts, principles, and practices in support of research and research operations. This role supports research which may include construction of specialized research facilities, setting up laboratories and laboratory equipment for research, and overseeing the operation of projects, including coordination and communication with contractors, engineers, architects, etc. This position also assists with activities and operations at off-campus research facilities and laboratories, and requires relocation of equipment, furniture, and supplies.
